Spalding's Athletic Library

A. G. SPALDING

Anticipating the present tendency of the American people toward a healthful method of living and enjoyment, Spalding's Athletic Library was established in 1892 for the purpose of encouraging athletics in every form, not only by publishing the official rules and records pertaining to the various pastimes, but also by instructing, until to-day Spalding's Athletic Library is unique in its own particular field and has been conceded the greatest educational series on athletic and physical training subjects that has ever been compiled.

The publication of a distinct series of books devoted to athletic sports and pastimes and designed to occupy the premier place in America in its class was an early idea of Mr. A. G. Spalding, who was one of the first in America to publish a handbook devoted to athletic sports, Spalding's Official Base Ball Guide being the initial

number, which was followed at intervals with other handbooks on the sports prominent in the '70s.

Spalding's Athletic Library has had the advice and counsel of Mr. A. G. Spalding in all of its undertakings, and particularly in all books devoted to the national game. This applies especially to Spalding's Official Base Ball Guide and Spalding's Official Base Ball Record, both of which receive the personal attention of Mr. A. G. Spalding, owing to his early connection with the game as the leading pitcher of the champion Boston and Chicago teams of 1872-76. His interest does not stop, however, with matters pertaining to base ball; there is not a sport that Mr. Spalding does not make it his business to become familiar with, and that the Library will always maintain its premier place, with Mr. Spalding's able counsel at hand, goes without saying.

Counsel at hand, goes without saying.

The entire series since the issue of the first number has been under the direct personal supervision of Mr. James E. Sullivan, President of the American Sports Publishing Company, and the total series of consecutive numbers reach an aggregate of considerably over three hundred, included in which are many "annuals," that really constitute the history of their particular sport in America year by year, back copies of which are even now eagerly sought for, constituting as they do the really first authentic records of events and official rules that have ever been consecutively compiled.

When Spalding's Athletic Library was founded, seventeen years ago, track and field athletics were practically unknown outside the larger colleges and a few athletic clubs in the leading cities, which gave occasional meets, when an entry list of 250 competitors was a subject of comment; golf was known only by a comparatively few persons; lawn tennis had some vogue and base ball was practically the only established field

sport, and that in a professional way; basket ball had just been invented; athletics for the schoolboy—and schoolgirl—were almost unknown, and an advocate of class contests in athletics in the schools could not get a hearing. To-day we find the greatest body of athletes in the world is the Public Schools Athletic League of Greater New York, which has had an entry list at its annual games of over two thousand, and in whose "elementary series" in base ball last year 106 schools competed for the trooply emblematic of the championship.

While Spalding's Athletic Library cannot claim that the rapid growth of athletics in this country is due to it solely, the fact cannot be denied that the books have had a great deal to do with its encouragement, by printing the official rules and instructions for playing the various games at a nominal price, within the reach of everyone, with the sole object that its series might be complete and the one place where a person could look with absolute certainty for the particular book in which he might be interested.

In selecting the editors and writers for the various books, the leading authority in his particular line has been obtained, with the result that no collection of books on athletic subjects can compare with Spalding's Athletic Library for the prominence of the various authors and their ability to present their subjects in a thorough and practical

A short sketch of a few of those who have edited some of the leading numbers of Spalding's Athletic Library is given herewith:

WALTER CAMP

For quarter of a century Mr. Walter Camp of Yale has occupied a leading position in college athletics. It is immaterial what organization is suggested for college athletics, or for the betterment of conditions, insofar as college athletics is concerned, Mr. Camp has always played an important part in its conferences, and the great interest in and high plane of college sport to-day, are undoubtedly due more to Mr. Camp than to any other individual. Mr. Camp has probably written more on college

athletics than any other writer and the leading papers and magazines of America are always anxious to secure his expert opinion on foot ball, track and field athletics, base ball and rowing. Mr. Camp has grown up with Yale athletics and is a part of Yale's remarkable athletic system. While he has been designated as the "Father of Foot Ball," it is a well known fact that during his college career Mr. Camp was regarded as one of the best players that ever represented Yale on the base ball field, so when we hear of Walter Camp as a foot ball expert we must also remember his remarkable knowledge of the game of base ball, of which he is a great admirer. Mr. Camp has edited Spalding's Official Foot Ball Guide since it was first published, and also the Spalding Athletic Library book on How to Play Foot Ball. There is certainly no man in American college life better qualified to write for Spalding's Athletic Library than Mr. Camp.

The distances of these two surfaces from each other, or in other words, the thickness of the discus, must be measured at right angles to an imaginary plane passing through the center of the discus and dividing its two symmetrical sides. Measurements must be made at the center at ¼ inch from the outer circumference of the circle and at other points on the imaginary plane; such points being at various distances from the center. At no point shall the thickness be greater than 2 inches; at all points within 1 inch from the center, the thickness shall be not less than 1¾ inches; at the point ¼ inch from the outer circumference the thickness shall be not less than ½ inch; the difference between the thicknesses measured at any two points shall not be greater than ½ inch if such two points be within ½ inch of each other.

The discus may be made of any material or combination of materials.

A discus shall be furnished by the Association or member thereof holding the games, but any competitor may use his own or any other competitor's discus, if such discus conforms with the rules in every respect.

The discus shall be thrown from a circle 7 feet in diameter. The circle and all the ground contained therein shall be at one level, and at no greater altitude than the ground upon which the discus is thrown.

The front half of the circle shall be designated by a line drawn through the center of the circle at right angles with the direction in which the throws are to be made.

Each competitor shall be allowed three throws, and the best four men shall each be allowed three more throws. Each competitor shall be credited with the best of all his throws.

Every throw shall count as one throw irrespective of whether the same be a fair throw or a foul throw.

It shall be a foul throw if the competitor, after he has stepped into the circle and started to make his throw, touches with any part of his body or clothing, the ground outside the circle before the discus strikes the ground. It shall also be a foul throw if the competitor, after the throw, touches, with any

part of his body or clothing, the ground forward of the front half of the circle.

If, during the act of throwing the discus, and either before or after it leaves the hand of the competitor, the discus touches the ground, it shall count as a throw.

The measurements of each throw shall be made from the nearest mark made by the fall of the discus to the inside circumference of the circle, on a line from such mark made by the discus to the center of the circle.

XXX

Associate clubs shall have entire charge of the entries of their own members in athletic meetings, provided, always, that no member shall enter, compete or take part in any event at any athletic meeting, the entries to which event shall not be limited to amateur athletics. This rule, however, shall not prevent this Association or its Executive Committee from prohibiting entries to any event or events.

XXXI

In all classes of limit events competitors shall not be debarred by reason of having made a better record after the closing of entries for such event.

XXXII

All cases of dispute and any question that may arise not provided for in these laws, and in the interpretation of these laws, shall be referred to the Executive Committee of the Association.

XXXIII

An Intercollegiate record is any record acceptable to the Association, made at the annual meeting of the I.C.A.A.A.

A Collegiate record is any record acceptable to the Association made at any meet held by a member of the I.C.A.A.A.

All such records shall be accepted either by the Association or by its Executive Committee, and any record accepted shall always be subject to such action as the Association may at any time take thereon.

The I.C.A.A.A. shall keep a list of all Inter-collegiate records, and another of all Collegiate records.

The Executive Committee, pursuant to Article XXI of the Constitution, selected Mr. James E. Sullivan to be the referee of the second annual cross country run, and in accordance with Article III of the By-laws, selected Mr. Frank H. Briggs to be the graduate manager, with Mr. Paul H. Pearson as his assistant.

The Executive Committee, in accordance with Article VIII of the By-Laws, declared a dividend of \$1,000 to be distributed in the manner set forth in the Constitution to those members of the Association entitled thereto by having been represented at the last annual field meeting.

The report of the Treasurer shows that the Association has funds to its credit in the Columbia Trust Company in the amount of \$2,719.63; in the Knickerbocker Trust Company in the amount of \$1,389.93, and in the New York Trust Company in the amount of \$3.25.

Amendments to the Constitution, By-laws and Laws of Athletics were proposed and sent out by the Secretary to the members in accordance with the provisions of the Constitution. Such proposed amendments were as follows:

By Columbia—That the words "third Saturday in November" be stricken from Article XII of the Constitution, and "first Saturday after Thanksgiving" be inserted instead and place thereof, so that the article as amended will read as follows: "The annual cross-country run shall be held on the first Saturday after Thanksgiving of each year." It is proposed by the Executive Committee to amend this proposed amendment so that the words "first Saturday after Thanksgiving" be stricken out and the words "at such time as may be decided by the Executive Committee" be inserted instead and place thereof; and further, that a new clause be added as follows: (2) "The date of the cross-country run shall be decided by the Executive Committee not later than May 30th in each year," so that the amended article as amended will read as follows:

- "(1) The annual cross-country run shall be held at such time in each year as may be decided by the Executive Committee.
- "(2) The date of the cross-country run shall be decided by the Executive Committee not later than May 30th in each year."

By the Executive Committee.—That Article X of the Laws of Athletics have the words "at 2:00 P. M." stricken therefrom, and the words "at such time as the Executive Committee shall di-

rect," inserted instead thereof, so that the article as amended will read as follows: "He (the starter) shall have entire control of the competitors at marks and shall be the sole judge of fact as to whether or not any man has gone over his mark. He shall be responsible for starting the track events promptly on each afternoon of the meet, at such time as the Executive Committee shall direct. He shall also be responsible for any unnecessary delay in the continuance of said events."

By the Executive Committee.—That the first paragraph describing the hammer be stricken from Article XXVIII of the Laws of Athletics, and the following paragraph, descriptive of the hammer as adopted in the Athletic Rules of the Amateur Athletic Union, be inserted instead thereof; so that the Article as amended will read as follows: "The hammer head shall be a metal sphere, and the handle shall be made of wire. Such wire must be best grade spring steel wire, not less than one-eighth of an inch in diameter, or No. 36 piano wire, the diameter of which is 102/1000 of an inch. If a loop grip is used, it must be of rigid construction. The length of the complete implement shall not be more than 4 feet, and its weight not less than 16 pounds."

By the Executive Committee—That a new article be adopted to amend the laws of athletics entitled "Throwing the Discus," such article to be the same as that recently recommended to the Amateur Athletic Union for its adoption, and which is as follows:

The discus must weigh not less than 4 pounds 6.4 ounces. Its largest dimension shall be a circle, of a diameter not less than 85% inches, and not more than 9 inches. In shape it must be symmetrical; each side being a counterpart of the other side. It must be smoothly finished, the surface and circumference having no projecting points, indentations, or sharp edges. The surfaces need not be flat, but may be waved or corrugated. The distances of these two surfaces from each other, or in other words, the thickness of the discus, must be measured at right angles to an imaginary plane passing through the center of the discus and dividing its two symmetrical

sides. Measurements must be made at the center at ¼ inch from the outer circumference of the circle and at other points on the imaginary plane; such points being at various distances from the center. At no point shall the thickness be greater than 2 inches; at all points within 1 inch from the center, the thickness shall be not less than 1¾ inches; at the point ¼ inch from the outer circumference the thickness shall be not less than ½ inch; the difference between the thicknesses measured at any two points shall not be greater than ½ inch if such two points be within ½ inch of each other. The discus may be made of any material or combination of materials. A discus shall be furnished by the Association or member thereof holding the games, but any competitor may use his own or any other competitor's discus, if such discus conforms with the rules in every respect.

The discus shall be thrown from a circle seven feet in diameter. The circle and all the ground contained therein shall be at one level, and at no greater altitude than the ground upon which the discus is thrown. The front half of the circle shall be designated by a line drawn through the center of the circle at right angles with the direction in which the throws are to be made.

Each competitor shall be allowed three throws, and the best four men shall each be allowed three more throws. Each competitor shall be credited with the best of all his throws. Every throw shall count as one throw irrespective of whether the same be a fair throw or a foul throw. It shall be a foul throw if the competitor, after he has stepped into the circle and started to make his throw, touches with any part of his body or clothing, the ground outside the circle before the discus strikes the ground. It shall also be a foul throw if the competitor, after the throw, touches, with any part of his body or clothing, the ground forward of the front half of the circle. If, during the act of throwing the discus, and either before or after it leaves the hand of the competitor, the discus touches the ground, it shall count as a throw. The measurements of each throw shall be made from the nearest mark made by the fall of the discus to the inside circumference of the circle, on a line from such mark made by the discus to the center of the circle.

The Executive Committee reports that Johns Hopkins, Haverford and Amherst have forfeited their membership in the association under Article III. of the Constitution by reason of not having been represented by three men for two consecutive years at the annual field meeting.

The Executive Committee recommends that the Association accept the courteous invitation of the University of Pennsylvania to hold the thirty-fifth annual field meeting on Franklin Field, Philadelphia, and that the meet be held on such field.

The Executive Committee further recommends that the Association express to Syracuse University its appreciation of the courteous invitation extended to the Association to hold the thirty-sixth annual field meeting in 1911, within the Stadium at Syracuse, and that the Association present to Syracuse as an expression of its present opinion a resolution stating that it is the sense of the annual meeting that the meet of 1911 be held on the athletic field of Syracuse University at Syracuse.

The Executive Committee further recommends that the applications of Wesleyan University and Colgate University for membership in the Association, be granted.

All the recommendations of the Executive Committee were adopted by the Association at the annual meeting, including the proposed amendments to the Constitution and Laws of Athletics.

Amherst, having proven to the satisfaction of the Association that the Executive Committee was in error in stating that it had not been represented at the Annual Field Meeting in accordance with Article III. of the Constitution, its membership continued as of course.

In regard to the forfeiture of membership on the part of Haverford for its non-compliance with Article III. of the Constitution, a statement was made by the representative of that college to the effect that it was through an unfortunate misinterpretation of the Constitution that its membership was allowed to lapse, and a request was made for reinstatement, and such explanation being satisfactory to the meeting it thereupon resolved that the application for reinstatement be granted.

the compilation of this book with a view to the systemization of the various events that form the distinctively athletic feature of school recreation. With its aid any teacher should be able to conduct a successful meet, while the directions given for becoming expert in the various lines will appeal to the pupil. Some of the leading athletes have contributed chapters on their specialties: Ray Ewry, holder of the world's high jump record, tells how to practice for that event; Harry Hillman, holder of the hurdle and three-legged records, gives hints on hurdle racing and three-legged racing; Martin Sheridan, allaround champion of America, gives directions for putting the shot; Harry F. Porter, high jump expert, describes how to become proficient in that event. The book is illustrated with photos taken especially for it in public

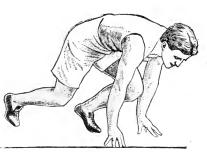

school yards.

Standard Policy

A Standard Quality must be inseparably linked to a Standard Policy.

Without a definite and Standard Mercantile Policy, it is impossible for a manufacturer to long maintain a Standard Quality.

To market his goods through the jobber, a manufacturer must provide a profit for the jobber as well as the retail dealer. To meet these conditions of Dual Profits, the manufacturer is obliged to

set a proportionately high list price on his goods to the consumer. To enable the glib salesman, when booking his orders, to figure out attractive profits to both the jobber and retailer, these high list prices are absolutely essential; but their real purpose will have been served when the manufacturer has secured his order from the jobber, and the jobber has secured his

order from the retailer. However, these deceptive high list prices are not fair to the consumer, who does not, and, in

reality, is not ever expected to pay these fancy list prices.

When the season opens for the sale of such goods, with their misleading but alluring high list prices, the retailer begins to realize his responsibilities, and grapples with the situation as best he can, by offering "special discounts," which vary with local trade conditions.

Under this system of merchandising, the profits to both the manufacturer and the jobber are assured; but as there is no stability maintained in the prices to the consumer, the keen competition amongst the local dealers invariably leads to a demoralized cutting of prices by which the profits of the retailer are practically eliminated.

This demoralization always reacts on the manufacturer. The jobber insists on lower, and still lower, prices. The manufacturer in his turn, meets this demand for the lowering of prices by the only way open to him, viz.: the cheapening and degrading of the quality of his product.

The foregoing conditions became so intolerable that, ten years ago, in 1899, A. G. Spalding & Bros. determined to rectify this demoralization in the Athletic Goods Trade, and inaugurated what has since become known as "The Spalding Policy."

The "Spalding Policy" eliminates the jobber entirely, so far as Spalding Goods are concerned, and the retail dealer secures his supply of Spalding Athletic Goods direct from the manufacturer under a restricted retail price arrangement by which the retail dealer is assured a fair, legitimate and certain profit on all Spalding Athletic Goods, and the consumer is assured a Standard Quality and is protected from imposition.

The "Spalding Policy" is decidedly for the interest and protection of the users of Athletic Goods,

and acts in two ways:

FIRST-The user is assured of genuine Official Standard Athletic Goods, and the same fixed prices to everybody

SECOND-As manufacturers, we can proceed with confidence in purchasing at the proper time, the very best raw materials required in the manufacture of our various goods, well ahead of their respective seasons, and this enables us to provide the necessary quantity and absolutely maintain the Spalding Standard of Quality.

All retail dealers handling Spalding Athletic Goods are required to supply consumers at our regular printed catalogue prices-neither more nor less-the same prices that similar goods are sold for in our New York, Chicago and other stores.

All Spalding dealers, as well as users of Spalding Athletic Goods, are treated exactly alike, and no special rebates or discriminations are allowed to anyone.

Positively, nobody; not even officers, managers, salesmen or other employes of A. G. Spalding & Bros., or any of their relatives or personal friends, can buy Spalding Athletic Goods at a discount from the regular catalogue prices.

This, briefly, is the "Spalding Policy," which has already been in successful operation for the past ten years, and will be indefinitely continued.

In other words, "The Spalding Policy" is a "square deal" for everybody.

A. G. SPALDING & BROS.

Standard Quality

An article that is universally given the appellation "Standard" is thereby conceded to be the Criterion, to which are compared all other things of a similar nature. For instance, the Gold Dollar of the United States is the Standard unit of currency, because it must legally contain a specific proportion of pure gold, and the fact of its being Genuine is guaranteed by the Government Stamp thereon. As a protection to the users of this currency against counterfeiting and other tricks, considerable money is expended in maintaining a Secret Service Bureau of Experts. Under the law, citizen manufacturers must depend to a great extent upon Trade-Marks and similar devices to protect themselves against counterfeit products—without the aid of "Government Detectives" or "Public Opinion" to assist them.

Consequently the "Consumer's Protection" against misrepresentation and "inferior quality" rests entirely upon the integrity and responsibility of the "Manufacturer."

A. G. Spalding & Bros. have, by their rigorous attention to "Quality," for thirtythree years, caused their Trade-Mark to become known throughout the world as a Guarantee of Quality as dependable in their field as the U. S. Currency is in its field.

The necessity of upholding the guarantee of the Spalding Trade-Mark and maintaining the Standard Quality of their Athletic Goods, is, therefore, as obvious as is the necessity of the Government in maintaining a Standard Currency.

Thus each consumer is not only insuring himself but also protecting other consumers when he assists a Reliable Manufacturer in upholding his Trade-Mark and all that it stands for. Therefore, we urge all users of our Athletic Goods to assist us in maintaining the Spalding Standard of Excellence, by insisting that our Trade-Mark be plainly stamped on all athletic goods which they buy, because without this precaution our best efforts towards maintaining Standard Quality and preventing fraudulent substitution will be ineffectual.

Manufacturers of Standard Articles invariably suffer the reputation of being high-priced, and this sentiment is fostered and emphasized by makers of "inferior goods," with whom low prices are the main consideration.

I Goods, with a reputation to uphold and a igher prices than a manufacturer of cheap for Standard Quality depends principally
